Subject: Upload of LPCOs issued by PGAs under SWIFT 2.0 for NOC processing

It has been observed that trade users are facing issues in using certain document codes to upload LPCO (Licenses, permissions, certificates and other authorizations) documents for issuance of NOC by PGAs under SWIFT 2.0. As per Circular No 44/2018-Customs and 13/2019-Customs, LPCOs issued by PGAs are to be uploaded in e-Sanchit by PGA officers linking it to an IEC of a trade user. IRNs of such PGA uploaded documents are available for the trade user to link with a BE. However, it is observed that this feature is not being utilized by PGA officers.

2. Under SWIFT 2.0, all issued LPCOs/NOC issued by the PGAs would be made available under the Compliance Repository along with the IRN of the uploaded document. User can then utilize these documents for NOC processing. However, this implementation is pending at the PGA's end.

3. In reference to this issue wherein trade users are unable to upload certain documents under specific Document Codes, it is informed, until the implementation as per Para 2 is completed and deployed, trade users are advised to upload the relevant LPCOs using the document code 101004 available for **'Any other document'**.
